Air Operations Inc

Flight Operations Memorandum

To: All Pilots

From: Michael den Hartog, Director of Flight Operations

Subject: Review and Compliance with the Attached COA

All Pilots,

The attached Certificate of Waiver or Authorization (COA) establishes the conditions under which the operations it covers may be conducted. Before participating in any flight under this COA, each pilot must review the complete document, including its special provisions, attachments, and applicable amendments, and understand the requirements relevant to the assigned mission.

Before flight, confirm that the planned operation falls within the COA's authorized location, airspace, altitude limits, effective dates, and operating conditions. Verify that the assigned aircraft and personnel meet the applicable requirements and that all required notifications, coordination, and approvals have been completed. Review current airspace restrictions, notices, weather, and site conditions as part of mission planning.

The pilot in command must ensure that the crew understands its responsibilities, communication procedures, operating limits, and contingency and emergency actions. Keep the applicable COA and supporting operational documents accessible during the mission. An authorization does not remove the responsibility to assess changing conditions and conduct the flight safely.

If any provision is unclear, required coordination is incomplete, or the planned mission exceeds the authorization, do not begin the operation. Refer the matter to Flight Operations for clarification before proceeding. If conditions change during flight so that safe or compliant operation cannot be maintained, take appropriate action to safely discontinue the operation and notify Flight Operations.

Complete all records and reports required by the attached COA and applicable company procedures. Promptly bring any deviation, incident, or operational concern to Flight Operations so that required follow-up can be addressed.

This memorandum accompanies the COA as a reminder of our operational responsibilities. It does not amend, extend, or replace the authorization or its provisions. Every pilot is expected to apply these requirements consistently and exercise sound judgment on every mission.

Thank you for your attention to safe and compliant flight operations. Before any COA is considered Authorized for your flight you must notify the "Responsible Party" located on the first page on the COA and they must be available at that number for the duration of the flight. To schedule operations text 913.219.1370 or call the emergency number on the COA. You can also send meeting invites to airopsinc@outlook.com to schedule operations. Please include: Site FA number, Lat/Long, COA number, and the date and time window you intend to fly.

Michael den Hartog - Director of Flight Operations - Air Operations Inc.

Small UAS, 14 CFR Part 107.41 – Vertical Structure Nationwide
Airspace Authorization, FAA Form 7711-1 2025-P107-ESA-26380

This Airspace Authorization (AA) is issued for the operations specifically described hereinafter. No person shall conduct any operation pursuant to the authority of this AA except in accordance with the standard and special provisions contained in this AA, and such other requirements of the Code of Federal Regulations (CFR) not specifically waived.

OPERATIONS AUTHORIZED
Operation of a small Unmanned Aircraft System (sUAS) flown under 14 CFR Part 107, *Small Unmanned Aircraft Systems*. Operations under this AA are limited to the maximum altitude listed below.
Class(es) of Airspace: B, C, D and airspace within the lateral boundaries of the surface area of Class E airspace designated for an airport.
At or Below: In accordance with the published UAS Facility Maps (UASFM), except when operating in accordance with paragraph 2.h., *Schedule of Flight Operations* of this AA.
Location: Nationwide

LIST OF WAIVED REGULATIONS BY SECTION AND TITLE
N/A

STANDARD PROVISIONS

1. A copy of the application made for this AA shall be made available upon request.
2. This AA shall be presented for inspection upon the request of any authorized representative of the Federal Aviation Administration (FAA) or of any State or municipal official charged with the duty of enforcing local laws or regulations.
3. The holder of this AA shall be responsible for the strict observance of the terms and provisions contained herein.
4. This AA is nontransferable.

Note- This AA constitutes a waiver of those Federal rules or regulations specifically referred to above. It does not constitute a waiver of any State law or local ordinance.

SPECIAL PROVISIONS

Special Provisions **1** to **4**, inclusive, are set forth on the following pages.

This AA, 2025-P107-ESA-26380, is effective from 9/30/2025 to 9/29/2027, and is subject to cancellation at any time upon notice by the Administrator or his/her authorized representative.

(Title)

FAA Form 7711-1 (7-74)

SPECIAL PROVISIONS

1. CONTACT INFORMATION:

a. Michael den Hartog is the person designated as responsible for the overall safety of UAS operations under this AA. During UAS operations for on-site communication/recall, the Responsible Person shall be continuously available for direct contact at (669) 247-6776 ext. 1.

b. Michael den Hartog listed on this AA must maintain a current list of pilots by name and the aircraft registration number(s) associated with the AA holder's operation. This list must be presented for inspection upon request from the Administrator or an authorized representative.

2. SCHEDULE OF FLIGHT OPERATIONS:

a. This AA can be rescinded by the FAA at any time and is issued to allow operations under 14 CFR Part 107 as specified in the Operations Authorized section of this document.

b. No person may operate an unmanned aircraft (UA) in prohibited or restricted areas unless that person has permission from the using or controlling agency, as appropriate. The AP1A/B lists agencies scheduling special use airspace (SUA).

c. This AA does not relieve the Remote Pilot in Command (RPIC) from the responsibility to check the airspace they are operating in and comply with all restrictions that may be present in accordance with see 14 CFR 107.45 and 107.49 (a)(2), such as restricted and prohibited airspace, temporary flight restrictions (TFR), and the Washington, D.C. Metropolitan Area Flight Restricted Zone, etc. without pre-approval.

d. The RPIC must operate the aircraft in a manner that does not interfere with and gives way to any manned aircraft.

e. The facility with jurisdiction or designated representative may disapprove, terminate, restrict, or delay UAS flight operations covered by this AA at any time.

f. The RPIC is responsible for reviewing the current UASFM prior to each flight, noting any changes to the area of operations (i.e., airspace modifications, TFRs, etc.). Open the UASFM website at https://udds-faa.opendata.arcgis.com, scroll down and open the "Visualize It" section.

g. The RPIC must view current Notices to Airmen (NOTAMs) at https://pilotweb.nas.faa.gov/PilotWeb/.

h. Operations by sUAS above the UASFM altitudes performing vertical structure inspections may be conducted if the following criteria are met, the sUAS must:

(1) Remain within a 100-foot radius of the structure and no more than 100 feet from the upper most portion of the vertical structure,
(2) Remain within visual line of sight of the RPIC,
(3) Not operate within two (2) nautical miles of any landing surface of an airport, heliport, or seaplane base, except as otherwise authorized under a separate AA,
(4) Remain no less than 500 feet below and 2,000 feet horizontally from the clouds, and
(5) The minimum flight visibility, as observed from the location of the control station must be no less than three (3) statute miles.

i. If operations under this AA are being conducted in conjunction with an operational waiver or grant of exemption, then all provisions of those documents must be complied with in addition to the provisions of this airspace authorization. If there is a conflict in provisions between the documents, the holder of this authorization and RPIC are responsible for complying with the most restrictive provision.

j. This AA and the Special Provisions shall be in effect for day operations. Operations during civil twilight (as defined in 14 CFR 107.29(c)) must only be conducted when operating in accordance with 14 CFR Part 107.29, *Operation at Night*.

3. EMERGENCY/LOST LINK/LOST COMMUNICATIONS PROCEDURES:

a. If the UAS loses communications or loses its Global Positioning System (GPS) signal, the UA must return to a pre-determined location within the operating area and land. Lost link procedures must not present an undue hazard to other aircraft by performing such maneuvers as crossing a runway.

b. The RPIC must abort the flight in the event of unpredicted obstacles or emergencies.

4. SPECIAL INSTRUCTIONS:

a. This authorization excludes airspaces controlled by the Department of Defense (DoD).

AUTHORIZATION: This AA does not waive any CFRs not specifically stated, nor any state law or local ordinance. Should the proposed operation conflict with any state law or local ordinance, or require permission of local authorities or property owners, it is the responsibility of the holder of this authorization to resolve the matter. The holder of this authorization is hereby authorized to operate a UA in the National Airspace System within the areas defined in the Operations Authorized section of the cover page.
